

"LTS - Device Technologies" (LTS-DT) is a business unit of **"LTS Lohmann Therapie-Systeme AG"**.

LTS - Device Technologies is a business unit which is focused on design, development, and production of wearable and sterile medical devices for infusion and injection.

LTS - Device Technologies develops product specifications and maintains control over the product specifications, design and development, and manufacturing activities conducted by its suppliers and contractors.

It is the policy of **LTS - Device Technologies** to:

- Develop medical devices that meet or exceed customer requirements.
- Establish and maintain the effectiveness of the Quality & Environmental Management Systems, ensure the effectiveness and safety of its devices and the continuous improvement of its business processes, personnel, and facilities.
- Monitor the Quality & Environmental Management Systems, to ensure the ongoing effectiveness and ensure that customer and all regulatory requirements and international standards are met.
- Comply with relevant requirements of the Quality & Environment Management System.
- Establish Quality & Environmental objectives for its products and processes, review performance against those objectives on a regular basis, and update the objectives as appropriate.
- Identify all the Quality & Environmental aspects involved in the company's operation, assess their impact, and exercise control measures to eliminate or reduce these effects.
- LTS-DT is committed to maintain the effectiveness of the Quality & Environmental management systems, ensure the safety and effectiveness of its devices and the continuous improvement of its business processes, personnel, and facilities.

**WE CARE.
WE CREATE.
WE DELIVER.**
